The Logic of Information

Titel	The Logic of Information
Publicatietype	Boek
Publicatiejaar	2019
Auteurs	Floridi, L. ^[1]
Secundaire titel	A Theory of Philosophy as Conceptual Design
Pagina's	272
Publicatiedatum	03/2019
Uitgever	Oxford University Press
Plaats uitgave	Oxford
Taal	EN
ISBN Nummer	9780198833635
RefMan	10266

Information is a [conceptual labyrinth](#) and at the same time a [hyperobject](#)

Samenvatting

Luciano Floridi presents an innovative approach to philosophy, conceived as conceptual design. He explores how we make, transform, refine, and improve the objects of our knowledge. His starting point is that reality provides the data, to be understood as constraining affordances, and we transform them into information, like semantic engines. Such transformation or repurposing is not equivalent to portraying, or picturing, or photographing, or photocopying anything. It is more like cooking: the dish does not represent the ingredients, it uses them to make something else out of them, yet the reality of the dish and its properties hugely depend on the reality and the properties of the ingredients. Models are not representations understood as pictures, but interpretations understood as data elaborations, of systems. Thus, Luciano Floridi articulates and defends the thesis that knowledge is design and philosophy is the ultimate form of conceptual design. Although entirely independent of Floridi's previous books, *The Philosophy of Information* (OUP 2011) and *The Ethics of Information* (OUP 2013), *The Logic of Information* both complements the existing volumes and presents new work on the foundations of the philosophy of information.
