The semantic web

Titel	The semantic web
Publicatietype	Artikel
Publicatiejaar	2001
Auteurs	Berners-Lee, T. [1], Hendler J. [2], & Lassila O. [3]
Secondaire titel	Scientific American
Publicatiedatum	05/2001
Taal	EN
RefMan	5647
Trefwoord(en)	interopebiliteit [4], ontologie [5], rdf [6], semantisch web [7], taxonomie [8], thesaurus [9], uitwisselbaarheid [10]
Samenvatting	"The Semantic Web is an extension of the current web in which information is given well-defined meaning, better enabling computers and people to work in cooperation." Definition: The Semantic Web is the representation of data on the World Wide Web. It is a collaborative effort led by W3C with participation from a large number of researchers and industrial partners. It is based on the Resource Description Framework (RDF), which integrates a variety of applications using XML for syntax and URIs for naming.
