Betekenis van archief

The question of the archive is not a question of the past. It is not the question of a concept dealing with the past that might already be at our disposal. An archivable concept of the archive. It is a question of the future, the question of the future itself, the question of a response, of a promise, and of a responsibility for tomorrow. The archive, if we want to know what that will have meant, we will only know in times to come; not tomorrow, but in times to come. Later on, or perhaps never.

Auteur:

Jacques Derrida
