Metadata in a nutshell

Titel	Metadata in a nutshell
Publicatietype	Artikel
Publicatiejaar	2001
Auteurs	Day, M. [1]
Uitgever	UKOLN: the UK Office for Library and Information Networking, University of Bath, UK
Plaats uitgave	Bath
Taal	EN
RefMan	5570
Samenvatting	Metadata is sometimes defined literally as 'data about data,' but the term is normally understood to mean structured data about resources that can be used to help support a wide range of operations. These might include, for example, resource description and discovery, the management of information resources and their long-term preservation.
Aantekeningen	[Draft of an article published in Information Europe 6(2), Summer 2001, p. 11. Information Europe is the quarterly magazine of EBLIDA (the European Bureau of Library, Information and Documentation Associations)].
